AZURE DATA ENGINEER

PROFESSIONAL SUMMARY

Azure Data Engineer with 2.9+ years of experience designing and developing scalable **data pipelines**, **ETL/ELT workflows**, **data ingestion frameworks**, and **Lakehouse solutions** on **Microsoft Azure**. Hands-on expertise in **Azure Databricks**, **PySpark**, **Apache Spark**, **Delta Lake**, **Azure Data Factory (ADF)**, **ADLS Gen2**, **Azure SQL**, and **SQL**. Experienced in **data modelling**, **Medallion Architecture**, **batch and real-time processing**, **data quality**, **data profiling**, **performance tuning**, **monitoring**, **CI/CD**, and **production troubleshooting**. Delivered **50+ ETL pipelines** and processed **100M+ records**, improving data preparation, query performance, and operational efficiency.

TECHNICAL SKILLS

- **Data Engineering:** PySpark, Azure Databricks, Apache Spark, Delta Lake, SQL
- **Azure & Cloud:** Microsoft Azure, ADLS Gen2, Azure Data Factory, Azure SQL, Azure Blob Storage
- **Architecture & Processing:** Data Pipeline Architecture, ETL, Data Ingestion, Data Modelling, Medallion Architecture, Lakehouse, Batch Processing, Real-Time Processing, Performance Tuning
- **Data Quality & Monitoring:** Data Quality, Data Profiling, Monitoring, Alerting
- **Databases:** Azure SQL, MSSQL, Oracle, MySQL
- **DevOps & Delivery:** Azure DevOps, GitHub, CI/CD, Databricks Unity Catalog

PROFESSIONAL EXPERIENCE

Tata Consultancy Services **Dec 2023 - Present**

Data Engineer | Client: Kenvue Inc. *Kolkata, India*

- **Optimized** Azure Databricks ETL pipelines using **PySpark, SQL, and Azure Data Factory (ADF)**, reducing data preparation time by 40% and improving pipeline efficiency for enterprise supply chain analytics and Integrated Business Planning (IBP).
- **Implemented scalable data modelling** with **Star/Snowflake schemas, Delta Lake optimization, and partitioning** for 100M+ records across healthcare, sales, inventory, and supply chain workloads, reducing query latency by 35%.
- **Architected discount, inventory, and supply planning data models** in Azure Databricks using **Databricks SQL and PySpark** for Projected Supply Inventory, Demand Supply Suite, IBP, and OTIF KPIs; enabled real-time visibility and contributed to a 27% increase in stock movement.
- **Designed and developed 50+ scalable ETL pipelines** using **Azure Data Factory (ADF) and Azure Databricks** to process large-scale structured and semi-structured datasets, contributing to a 10% reduction in overall data processing time.
- **Built and maintained multi-source data ingestion pipelines** using **ADF, ADLS Gen2, and Azure Blob Storage**, reducing manual data processing effort by 60% and improving pipeline execution efficiency.
- **Authored and optimized complex SQL transformations** using joins, subqueries, CTEs, and window functions for multi-source analytics, supply chain KPI reporting, inventory analytics, and sales performance; reduced recurring analytics execution time by 40% and improved query response times by up to 80%.
- **Developed SQL-based data quality, profiling, monitoring, and alerting** to improve accuracy, completeness, reliability, and timely availability of enterprise datasets; supported **Azure DevOps CI/CD** deployments and production troubleshooting with Business Analysts, QA, and business stakeholders.

EDUCATION

Government College of Engineering & Textile Technology, Serampore **Sept 2019 - Jul 2023**

Bachelor of Technology in Information Technology

CERTIFICATIONS

- *Microsoft Certified: Azure Fundamentals (AZ-900)*
- *Databricks Certified Data Engineer Associate*

AWARDS & ACHIEVEMENTS

- **Received the “On the Spot (2025)” Award from Tata Consultancy Services** for exceptional performance, delivery ownership, and contributions to data engineering initiatives.
- **Earned multiple client and manager appreciations** for high-quality delivery, prompt issue resolution, and consistent execution of critical analytics and supply chain data requirements.
